of Industrial Performance
of Dairy Companies

MIP Management of Industrial Performance of dairy companies

A unique degree in
France for current and
future executives in the
dairy industry

Business School degrees) who are pursuing their studies and want to specialise in the sector.

The MIP executive «Mastère Spécialisé» program aims to bring the knowledge, skills, and tools that are necessary to both take on managerial responsibilities in dairy companies, and to manage their industrial performance.

The MIP MS® offers an original organisation which brings several institutions of higher education together. AgroSup Dijon and ENSAIA oversee the degree and it is taught in partnership with ENILBIO de Poligny, ENIL de Mamirolle and AgroParis Tech.

The «Management of Industrial Performance of Dairy Companies» Specialised Master (MS) is an advanced professional degree, which can be done through both initial and continuing education. **It is designed for current executives in the dairy sector, as well as for students (with Master, Engineering and**

What is an executive «Mastère Spécialisé» program ?

A Mastère Spécialisé® is a post master degree which is accredited by the prestigious Conférence des Grandes Écoles (CGE).

The Mastère Spécialisé® is a certification guaranteeing international standards of excellence and equivalence, as well as a degree awarded by AgroSup Dijon.

“ ” Testimonials...

Vice-President

Lactalis American Group

Jean-Paul QUIBLIER

Our companies are seriously looking for executives who are trained specifically in the dairy industry. A multidisciplinary approach which allows these executives to master economic intelligence and industrial performance is a solid asset to our dairy and cheese making firms. Knowledge of the economic environment at a local, national, European and international level, in addition to understanding ever increasing volatile markets are the keys to sustaining and developing competitiveness in the dairy industry.

The MIP Specialised Master (MS® MIP) allows future executives to be part of the strategic orientation of their companies.

Christophe PILLON, Class of 2013.

The MIP Specialised Master (MS® MIP) offers several opportunities. For the degree seeker, it's the chance to gain perspective on his/her profession, to acquire more specific knowledge and to create a network with professionals in the dairy sector.

For companies, there is a substantial financial gain thanks to the study the degree seeker carries out for his/her professional thesis.
